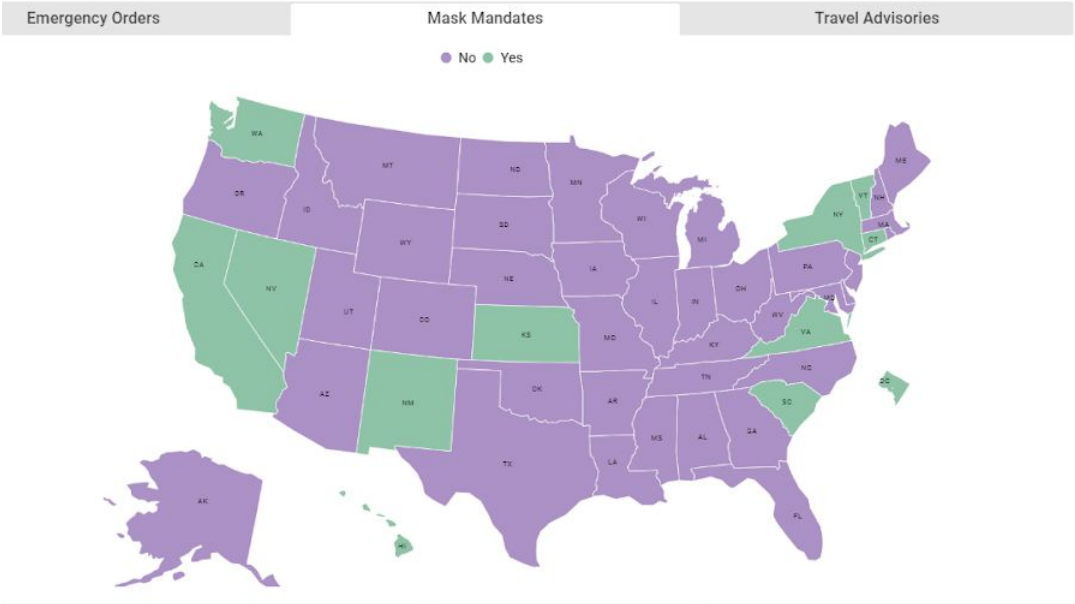
Unmask Our Kids

To All Connecticut Superintendents and BOE Members

Time for Choice

We are no longer in a state of emergency. The majority of states are not following mask mandates anymore. Why should we? It appears, politics are now being used as a weapon and it is only hurting our children. Masks are putting our kids at risk for illness including bacterial infection, headaches, etc. If the Covid screeners and those working in a virology lab need to wear this, how does a simple cloth mask stop anything anyway?

We are only one of ten states with a mask mandate



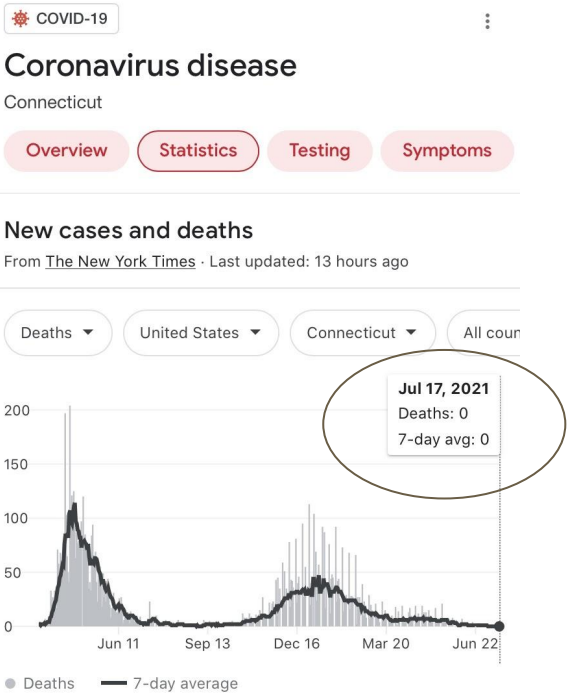
https://www.nashp.org/governors-prioritize-health-for-all/

Lamont says its because of the Delta variant

Many parents raise concerns about the health impacts of mask-wearing on young children, arguing that it restricts their breathing and is detrimental to their social and emotional well-being. And they question why their children should remain masked when COVID-19 case rates are low in Connecticut and children are generally less vulnerable to severe complications from the virus.

Will Connecticut lift its mask mandate for children in school this coming school year? Gov. Ned Lamont **said in late June** that he was not prepared to eliminate the mandate, citing concerns about the Delta variant, a highly transmissible strain of COVID-19 that now makes up **more than 60%** of new COVID-19 cases in the state.

What is the real risk of covid, at this time?



Delta variant is here. NO DEATHS. More contagious maybe, more deadly? NO

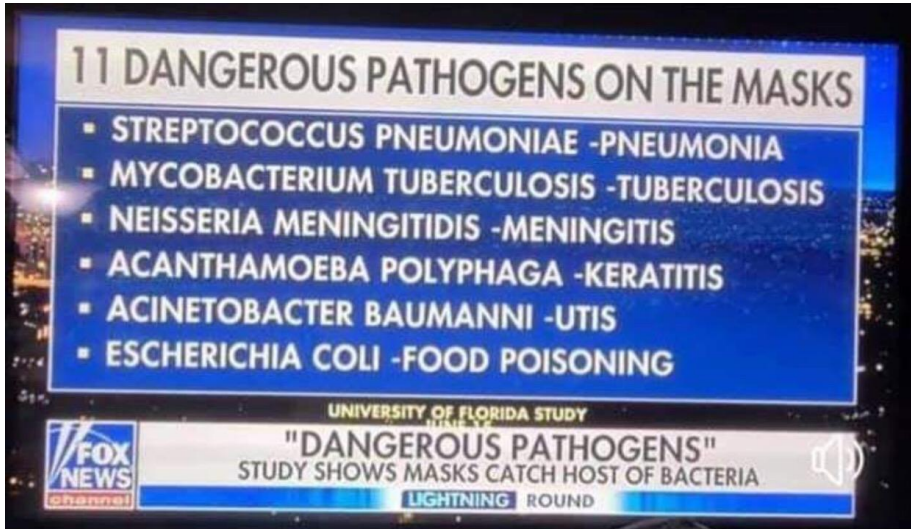
What are the potential risks of masks?

Despite the governors office's attempt to discredit this study, (and the powers at be) working to retract it - this study raises questions about the dangers of masks.

Jama Pediatrics conducted a randomized critical trials and concluded that there was ample evidence of adverse effects of wearing such masks including carbon dioxide poisoning. Suggesting children should not wear face masks. Experimental Assessment of Carbon Dioxide Content in Inhaled Air With or Without Face Masks in Healthy Children: A Randomized Clinical Trial | Pediatrics | JAMA Pediatrics | JAMA Network - June 20, 2021

The *American Institute for Economic Research*, stated that "masking children was tragic, unscientific, and damaging." Paul E. Alexander with a degree in epidemiology from McMaster University in Hamilton, Ontario, a master's degree from Oxford University, and a PhD from McMaster University's Department of Health Research Methods, Evidence, and Impact - Mar. 10, 2021

Parents sent their masks to the lab for testing, and this is what they found

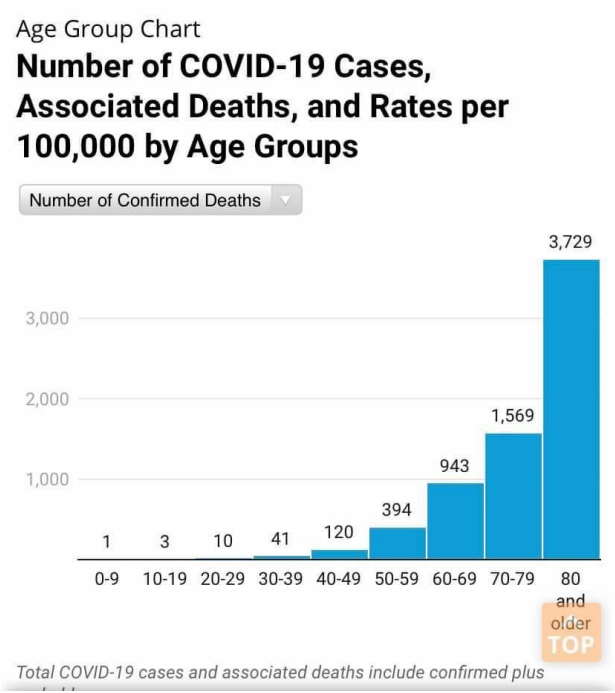


How many "died" in Connecticut since the pandemic began?

With over 3.565 Million People Living in CT. How deadly was it?

Please see next slide, and examine the age brackets of those least affected.

https://portal.ct.gov/coronavirus/covid-19-data-tracker



Can we trust the numbers?

Dr. Deborah Birx blatantly admits that all cases will be labeled covid. It doesn't matter if it was of covid, or with covid. "If someone dies **with** Covid-19 we are counting it as a covid death."

- April 2020 press conference.

Did the PCR test overcount positive cases?

The World Health Organization released guidance on proper use of PCR tests - January 14, 2021
A month after the vaccine is introduced.

Dr David Samadi that reads: "The World Health Organization has now released guidance to laboratories around the world to reduce the cycle count in PCR tests to get a more accurate representation of COVID cases. The current cycle was much too high and resulting in any particle being declared a positive case."

Of course, this information was "fact checked" as being out of context. However, other conclusions can be drawn from this statement. Many doctors and scientists have stated the same thing, saying that these tests were scientifically **meaningless.**

Did you know Ned Lamont is making millions off PCR tests and vaccines? Why was everyone tested, even with no symptoms? Conflicts of interest runs deep.

Co-founder Annie Lamont - (Oak Investment Partners) SEMA4 - a health intelligence company was given a NO BID CONTRACT for the entire state PCR testing , in which the Lamont family profited an estimated 3 million dollars a day testing first responders, state employees, residents of long-term care facilities, among others.

www.courant.com "Family investments, coronavirus pandemic put Gov. Ned Lamont on ethical tightrope."

Ned Lamont's daughter is rolling deep in the Department of Education. She was hired as political appointee. CTPOST article June 14, 2021.

Did you know? Ned Lamont used his political powers to threaten our state representatives to vote to extend his emergency powers?

Representative Robyn Porter stated during the recent emergency hearing, “there will be ramifications from the governor's office if we vote no.”

Why would he want his powers extended in a non-emergency?

Senator Will Haskell to constituent July 2021

If financial is the reason, masking does not need to be part of the extension, if we are simply looking to provide financial assistance to the aftermath of the pandemic.

Thanks so much for reaching out. I hope you had a nice holiday weekend, and I appreciate your input on this matter. First, please know that I will carefully consider the duration and details of any extension request that comes before the Senate. I desperately want to put this pandemic behind us and return to the normal procedures of governance and daily life.

However, I want to point out one reason why extending Governor Lamont's executive powers may be prudent. First, some federal funding is exclusively available to states operating under a declared state of emergency. For example, the Department of Social Services could lose tens of millions in SNAP benefits if the declaration lapses. As I'm sure you know, many families across my district and across the state are still feeling the financial repercussions of this crisis. Ending the state of emergency could force an unfortunate choice: should Connecticut spend more taxpayer dollars to support the nutritional needs of families who are struggling, or should we let these programs expire? In another key example, Connecticut's Department of Housing could lose funding from FEMA that enables them to provide shelter for those who are experiencing homelessness. With a potential spike in evictions around the corner, these programs may be more critical than ever.

I look forward to discussing this issue with my colleagues and learning more about the potential repercussions before casting my vote. Of course, I

Looney, Duff, Abrams Statement on Public Health Emergency Committee

Today, Senate President Pro Tempore Martin M. Looney, Senate Majority Leader Bob Duff, and Senate Chair of the Public Health Committee Mary Daugherty Abrams released the following statement in response to a Republican letter calling for a meeting to end the Governor's emergency declaration.

"We must unfortunately compose this letter because our Republican colleagues somehow believe despite all of the evidence to the contrary Connecticut's emergency protections against COVID-19 are merely a "convenience."

"Basic logic dictates that we should not stand down from a state of emergency during a pandemic. Every other American state and territory are in some sort of state of emergency.

"If Republicans get their way and end this state of emergency there will be dire consequences for our state. Connecticut is currently receiving hundreds of millions of federal dollars because we are in a state of emergency. If that ends we risk missing out on hundreds of millions more. There is also a potential risk for losing priority for vaccines. Connecticut ranks fourth in the nation in the percentage of the public having been vaccinated. Why would anyone want to stop that progress?

"Additionally, the General Assembly is fully operational despite Republicans opposing new rules allowing for remote work in order for our legislature to join the rest of the working world. Committee meetings, over two thousand bill proposals, and public hearings are all proceeding ensuring that Connecticut's legislature remains one of the most open in the country. Republicans wanted the legislature to ignore public health guidance and to meet in person. Now they are taking their extremism yet another step by trying to end Connecticut's state of emergency to put federal dollars at risk and most importantly the lives of the people of this state.

"Democrats in the State Senate will not vote to overturn extending the state of emergency in Connecticut and defy science, fiscal responsibility, public health, and reason."

Senate President Pro Tempore Martin M. Looney
Senate Majority Leader Bob Duff
Senate Chair of the Public Health Committee Mary Daugherty Abrams

-30-

Why else would he want his powers extended in a non-emergency?

“Kids under 12 cannot get vaccinated.” There would be zero incentive to get kids vaccinated, despite them being virtually unaffected by the virus.

Did you know?

“The *Journal of the American Medical Association,* three doctors affiliated with the Centers for Disease Control and Prevention encouraged schools nationwide to re-open, noting that “there has been little evidence that schools have contributed meaningfully to increased community transmission.”

- “**CDC director says schools can safely reopen without vaccinating teachers” -** CNBC Feb. 2021.

There is a push to keep masks on the unvaccinated

COVID SAFETY TEACHING & CLASSROOM REOPENING

CDC guidance for fall: Open schools, but unvaccinated students need masks

Encouraging Discrimination, Segregation & Bullying

We will be segregating and discriminating against students based on vaccine status. The State of Connecticut, as well as school districts have strict anti-discrimination and segregation laws! How would that work?

How will you protect this from happening in schools? How will you protect your students from ridicule or bullying? How is it ok for students to be branded as unvaccinated - aka potentially dirty or diseased? HIPAA protects people from having to provide their personal medical information. How is this a protection, if masks single them out? You would be infringing on students and parents rights.

What is the purpose of informed consent, if you can't say no!

Are they holding these ESSER funds over your head?

STATE OF CONNECTICUT
STATE BOARD OF EDUCATION

May 9, 2021

Dear Superintendents,

We are pleased to share your allocations for formula funding pursuant to the American Rescue Plan Act of 2021, Elementary and Secondary School Emergency Relief Funds (ARP ESSER) along with our guidance document, Connecticut's ARP ESSER Guidance: Reimagining Schools to Transform Students' Lives.

Connecticut received $1.1 billion in ARP ESSER funds, with 90 percent of these funds allocated to local education agencies (LEAs) using the Federal Fiscal Year 2020 Title I allocation as baseline for distribution. The balance of the funding will remain with the Connecticut State Department of Education (CSDE) for state-level activities, including specific set-asides for learning recovery, summer enrichment programs, and afterschool programming.

Unlike the previous two federal relief funds, ARP ESSER requires state education agencies and LEAs to create plans that focus on renewal, reducing opportunity gaps, accelerating learning, and advancing equity for all students. Further information can be found in the attached guidance. In addition, the priorities outlined expand and refine the CSDE's ESSER II state-level priorities to reflect the collective call to action to think boldly and create meaningful change. To spark innovation, information is included regarding implementable initiatives and resources in Connecticut and nationwide that an LEA may wish to pursue or build upon. This unprecedented level of funding offers the state and LEAs, in partnership with community and education stakeholders, the opportunity to reimagine how we serve our students.

In addition to planning for the use of ARP ESSER funds, we encourage LEAs to explore how they might take advantage of and/or leverage the summer initiatives put forth in Governor Lamont's American Rescue Plan Act Proposal, including but not limited to free access to Connecticut's museums and high-quality summer enrichment.

We look forward to undertaking this work with you and providing necessary supports for success.

Sincerely,

Charlene M. Russell-Tucker
Acting Commissioner of Education

Safe Return to In-Person Instruction and Continuity of Services Plan Template

CSDE

2 Safe Return to In-Person Instruction and Continuity of Services Plan Template — CSDE ARP ESSER

Please complete the table below with the LEA's mitigation strategy for each category. In developing the LEA's response, please review and consider the CDC guidance and the Connecticut DPH and CSDE guidance for each category.

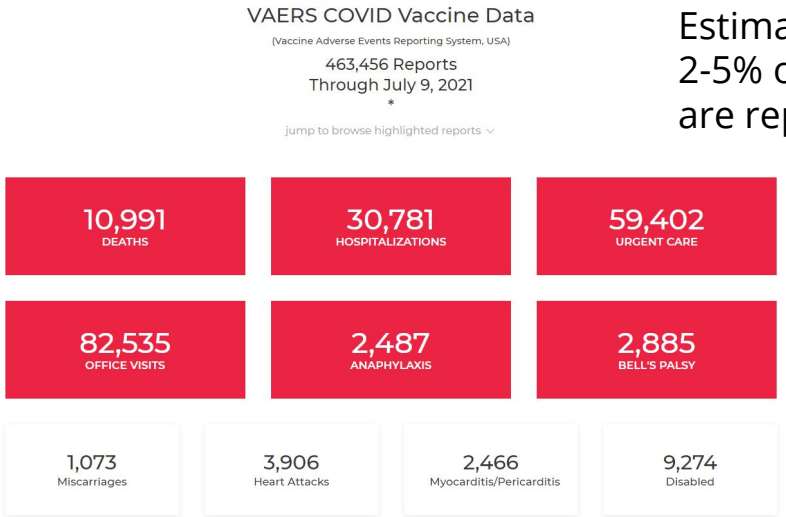
	Mitigation strategy	LEA response
	Universal and correct wearing of masks	**Are funds contingent of following the instructions?**
	Physical distancing (e.g., including use of cohorts/podding)	**Some districts will not be accepting these funds if it means masks.**

What about you?

Punishing kids for their family's medical decision

Punishing the kids who, for their own medical-making or their parents, decide not to submit to this mandate of an emergency use only - experimental mRNA shot - with documented side-effects. Despite the censorship of this data.

The Vaccine Adverse Reporting System of Vaers, created in 1990, and administered by the CDC and the FDA, is a database that allows Americans, and healthcare workers to document adverse reactions that happen after receiving a vaccine.



Estimated that only 2-5% of actual cases are reported.

Did you know?

- Manufacturer vaccine inserts were intentionally left blank? How do they get full informed consent without presenting the list of ingredients, and possible reactions?
- Vaccine manufacturers, and others including our state government is exempt from liability.
- Censorship is on the rise to hide the truth.

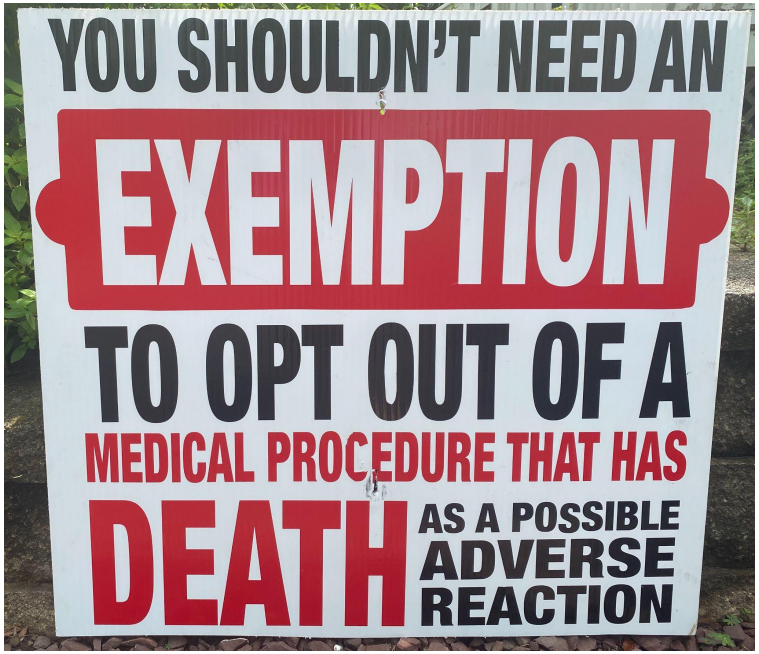
The Surgeon General just announced that the Rockefeller Foundation has pledged 13.5 million dollars to combat misinformation on social media.

The **Rockefeller** empire, in tandem with JP Morgan Chase, owns over half of **the pharmaceutical** interests in the United States.

Basically the Fox Guarding the Hen House!
You can't make this up.

We are no longer given a choice.

April 2021, Connecticut state legislature removed Our Non-Medical Exemption (Religious Exemption) except those grandfathered.



Are we paying attention to what is happening outside the classroom?

Luke Bryan & 30,000 Unmasked at Infinity Theater, including children. However, 25 healthy kids in a classroom is a risk without a mask.

We are asking that you stand up for our kids!

We ask that you come together as superintendents, BOE members, and teachers. We ask that you refuse to take part in this gross overreach of power. There is no longer a state of emergency, nor a risk to public health.

We ask for mask choice in the fall of 2021.
